## JOB WATCH

April 2007

### Ohio job market shows uptick

Ohio's job market showed an uptick in March, reversing the recent trend, according to seasonally adjusted payroll numbers for nonfarm wage and salary jobs released April 20 by the Ohio Department of Job and Family Services (ODJFS). The gain was the largest in any month since January 2006. However, month-to-month data can be volatile and are later revised, so it is unwise to put too much weight in a single month. Job losses earlier last winter still have left the state with fewer jobs than it had last fall or a year ago.

The chart above and the following statistics, based on the latest seasonally adjusted ODJFS payroll numbers, highlight recent changes in the Ohio job market:

	3/2007	1/2001	Job Change since 1/2001	Percent Change since 1/2001	6/05 (Ohio tax reform approved)	Job Change since 6/05	Percent Change since 6/05
<b>Total Jobs</b>	5,433.2	5,606.1	-172.9	-3.1%	5,423.1	10.1	0.2%
<b>Manuf. Jobs</b>	782.7	998.6	-215.9	-21.6%	811.3	-28.6	-3.5%

Source: Employer Survey, Ohio Department of Job & Family Services and U.S. Department of Labor Bureau of Labor Statistics, number of jobs in thousands. BLS numbers for months prior to February 2007, which sometimes differ very slightly from ODJFS numbers, are used here and above.

Since June of 2005, when an overhaul of state taxes was signed into law with the intent of creating jobs, employment in Ohio has grown by a modest 10,100 jobs, or 0.2 percent. During the same period, the nation added 4 million jobs, for a growth rate of 3.0 percent. U.S. manufacturing employment has fallen since June 2005 by 121,000 jobs. However, Ohio has lost more than 28,000 manufacturing jobs in the same period, more than four times the relative loss experienced by the nation as a whole.

Ohio is one of just four states, including Louisiana, Massachusetts and Michigan, that have lost jobs since the last recession officially ended in November 2001. Since then, the nation has added more than 6.7 million jobs.

The ODJFS reported from a separate survey of households that the Ohio unemployment rate in March rose to 5.2 percent, up from 5.0 percent rate in February. The increase came about because the number of unemployed grew.
